2. What Are Cookies?

Cookies are small text files placed on your device (computer, tablet, smartphone) when you visit a website. They allow the website to recognize your device on subsequent visits and enable various functionality.

Similar technologies include:

- **Local Storage / Session Storage:** Browser-based key-value storage used to persist data within a session or across sessions.
- **Pixels/Beacons:** Small image files embedded in web pages used to track page visits and user interactions.
- **Fingerprinting:** Techniques that use device characteristics to identify users without cookies.

TradVue primarily uses cookies and browser local/session storage.
